

Clinicalskills.net: the resource that helps you put best practice into practice!

Clinicalskills.net sets out to help clients deliver consistent, high-quality care reflecting current best practice. This platform is used by our **local HEI's** and so the students coming into primary care will be using it, in addition the community NHS Trusts, which is helpful for eg a nurse moving from secondary/community trust and working in primary care. Their prior learning can be evidenced and transferred over. Saving time and energy repeating training.

Ask SNEE Training Hub colleagues how you can get your personal login to Clinical Skills.net! snee.traininghub@nhs.net

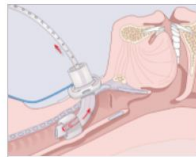

clinicalskills.net is an invaluable resource providing readily available, user-friendly guides to a wide range of clinical skills that are regularly updated.

The range of clinical skills accessible on clinicalskills.net is constantly being expanded so learners and professionals from all stages of their nursing careers are catered for.

The use of pictures and text provides different learning styles and there is access to printer-friendly formats to the information require. Useful links to other sites are also provided.

Students who have used clinicalskills.net throughout their University education programmes can continue to use clinicalskills.net in their work once they are qualified, or to help support their students.
